PROTECH GLOBAL SOLUTIONS ANNOUNCES EXPANSION

El Paso, Tex.—Protech Global Solutions, L.P., a multinational electronics contract manufacturer, announced plans to expand its headquarters in El Paso, Texas from 22,000 square feet to 30,000 square feet. The Company will move into the additional space later this month.

Protech has also enhanced its automated surface mount technology (SMT) assembly capability with the additional of a Panasonic CM402 pick-and-place machine and DEK Galaxy screen printer. The pick-and-place machine offers high speed placement capability, has the ability to handle a wide range of panel sizes and supports fast line changeovers. The screen printer also supports fast changeovers plus has the accuracy required to support product miniaturization trends. Protech currently operates three SMT lines in its El Paso facility.

“We see the El Paso, Texas/Juarez, Mexico border as an excellent crossroads to offer a binational manufacturing solution. We’ve expanded our El Paso operations to better support customers who prefer a Made in USA option. Our equipment additions reflect our commitment to invest in manufacturing technology that gives us the flexibility to support a high mix, low-to-medium volume production environment,” said Joe Villanueva, Protech Global Solutions’ president and co-founder.

About Protech Global Solutions

Headquartered in El Paso, Tex., Protech Global Solutions was founded in 2001. The Company has manufacturing facilities in both El Paso and Juarez, Mexico. It also operates a warehouse and provides third-party logistics services in El Paso. Its operations are registered to ISO 9001:2003. The Company specializes in providing scalable bi-national contract manufacturing solutions to companies in the industrial, consumer goods, alternative energy and transportation sectors.
